

Create your own WEB SHOP with TecDoc

**New for
vehicle parts-
dealers!**

With the new TecDoc WEB SHOP, you can add specific customer prices and your own article numbers to the WEB CATALOG and have your preferred suppliers displayed first.

This information can not only be designed individually, but also be updated daily. The possibility to connect to your own ordering/stock control system ensures maximum convenience in order processing. Your customer can place an order for the required parts with you directly online.

The design of the catalogue can be adapted to your own company colours and logos, so your customers are greeted by familiar colours and brands.

How customers use your WEB SHOP

- Your customers will access your WEB SHOP via an access area (Login) on your home page with access details like user name and password specified by you.
- There, your customers will see your WEB SHOP offer¹, make their selection and can order online.
- You can offer new customers a registration number, with which they can receive individual access data.

Your WEB SHOP: good, efficient, low cost

An “open” WEB SHOP is available to any customer. Registered customers have access to a “closed” WEB SHOP.

Depending on the customer having to register or not, there are different invoicing methods for the options due to technical details.

You can host and administer your current article and price data either at your premises or at TecDoc.

TecDoc Hosting: Your sensitive data will be located in a protected area to which you have exclusive admini-

strative access for viewing and updating. Warranted are the security of your sensitive data, high availability meaning highest fail-safe for your WEB SHOP at a bandwidth of 2 x 100 MBit line volume also at high simultaneous use of your WEB SHOP.

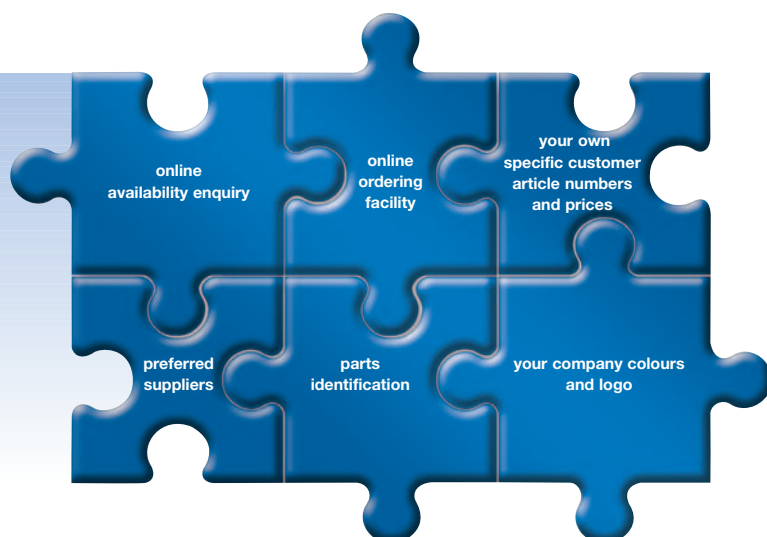

For creating and setting up a website, we are happy to send you a quote on request depending on scope.

¹ For 24 hour online availability of your prices and article numbers, you must have a fail-safe computer with a continuous internet connection at your site or via your web hosting provider.

We are happy to compile a tailor-made quote for you!

online ordering facility

The information source for the vehicle repair market with the original data of the parts manufacturers

Founded in 1994 by companies from the automotive aftermarket industry and the German Association for Spare Parts (GVA), TecDoc Informations System GmbH has established itself as the leading supplier of electronic spare parts information on the European market.

TecDoc supplies the free vehicle spares market with current and comprehensive data for identifying and ordering spares – for PC as well as CV – directly from the databases of co-operating automotive spares manufacturers in a standardised catalogue form.

The core tasks of TecDoc are still the standardisation, gathering and distribution of data as well as the development of the necessary data technique for these tasks.

Nevertheless, TecDoc works intensively on new projects to offer more efficient solutions to industry, trade and workshops.
